

## Software Engineers – Security Products

Applied Security, Inc. is seeking highly skilled and motivated software engineers to complement its staff of network security experts in the design and development of advanced security-related products.

We are looking for individuals with the experience, skill, and drive to join an elite team of engineers to build cutting edge, network security products. Ideal candidates are versatile, eager to learn and contribute, and are familiar with and committed to the full lifecycle software development process.

### Minimum Technical Requirements:

- Bachelor's degree in Engineering, Computer Science or equivalent work experience.
- Minimum of 5 years relevant software development experience.
- Extensive experience programming in C/C++.
- System-level programming experience implementing services, device drivers.
- Development experience in Control Processes/Threads, text/file manipulation, network programming, asynchronous IO, Named Pipes.
- Ability to multi-task and stay organized in dynamic, team-based work.
- Excellent communication skills, both verbal and written.
- Working knowledge of VMWare.
- Ability to imagine and produce cutting edge software.
- Ability to self-direct and self-motivate to achieve team and company goals.

Additional consideration will be given to candidates who have experience or familiarity with any of the following:

- Linux systems administration
- Perl development experience
- Database development, especially with very large data sets
- Malware analysis and/or reverse engineering of executables
- Web application development

### **Benefits**

Our environment is designed to attract and retain only the best, so our benefits include:

- The chance to work with the best engineers you can find
- Top-of-the-line computer with at least dual 22" monitors
