

UI Developer, Flex and JavaScript

Herndon, VA - U.S. Citizenship Required

Our firm specializes in designing and building hardware and software to meet our customers' next requirement. We focus on offering devices that can be fielded immediately to meet the mission needs that lie directly ahead. Size, weight, power, and packaging are of paramount importance in everything we design and build. Our expertise allows us to rapidly provide these solutions in specialized electronic/mechanical design, embedded and application-level software, reverse engineering and protocol analysis, and RF signals exploitation and communications systems.

Candidates should have 3+ years of experience designing and implementing web based user interface applications with experience in the following areas:

- Web User Interface Development using HTML5, JavaScript, Adobe Flash or Adobe Flex
- Object-oriented development
- Internet protocols (IP) and Network security (SSL) using Sockets
- Testing methodologies and/or frameworks.

Additional consideration will be given to candidates who have experience or familiarity with any of the following:

- Basic understanding of SQL and relational databases
- User interfaces for Geographic Information Systems (GIS)
- Linux Server side application development using Python, Perl, Java, C++
- Relational database experience such as PostgreSQL or MySQL
- Build systems such as Ant, Paver, or Rake
- Adobe AIR.

The position will focus on building RIA applications that communicate with services layers using AMF, JSON-RPC or other similar technologies.

About Us

We work on a broad spectrum of applications, from interactive data visualizations to complex control-panel applications to secure communication tools. We offer the opportunity to work on an array of fresh and interesting projects with a smart team of developers. We are a very technical company and we work hard to make our company a rewarding place to be.

About You

We're looking for someone enthusiastic about working with new technologies, who's excited about working closely with a small group of developers, who enjoys taking ownership of their work, who wants help us think about and design new software solutions, who wants to learn and pass on new ideas and technology.

Benefits

We offer our employees an excellent compensation and benefits package which includes generous salary and compensated absences, 401K matching with immediate vesting, fully-paid life, disability, health, dental, and vision insurance. Section 125, 529 College Savings Plan, and tuition assistance.

Qualified candidates should submit their resumes in MS Word or PDF format.

U.S. citizenship is required for this position. An Equal Opportunity Employer M/F/D/V

No third parties, no agencies, no subcontractors need apply.
